

Mohive e-Learning Publishing System Product overview

Datasheet

Mohive develops the Mohive e-Learning Publishing System, an enterprise software solution intended for large organisations.

Mohive's aim is to help these organisations unlock the potential of e-learning and help our customers build a true learning culture within their organisation.

Approach

Our aim is to deliver a well-developed, robust software system to large organisations looking to streamline their e-learning creation process.

While numerous software products focus on the authoring of e-learning, only Mohive is

able to support the whole content creation process, including:

- Planning the learning outcomes
- Collaborative authoring
- Review and quality assurance
- Publishing content

Ultimately, our aim is to increase a customer's bottom line by ensuring not only is there a cost-effective e-learning creation solution in-house, but that the training that is delivered enables an organisation to perform more efficiently and deliver better results.

Mohive develops the Mohive e-Learning Publishing System, an enterprise system that enables organisations to unlock the potential of e-learning. Mohive takes a unique, workflow-driven approach that enables non-experts to effectively create quality e-learning courses with the help and guidance from editors and project managers.

Easy authoring – powerful output

Mohive's unique approach to authoring helps make it one of the fastest, easy-to-use products on the market, yet the e-learning output is highly interactive and engaging. Designed with the subject matter expert in mind, Mohive enables rapid authoring that doesn't require in-depth technical skills.

Mohive provides authors with a series of templates that help them easily create a variety of exercises, including multiple choice, drag and drop, video, explore and many others. Authors can also easily create tests and question pools for testing.

Workflow

While many rapid e-learning tools talk about how easy and quick it is to author e-learning content, only Mohive delivers a robust workflow that guides e-learning projects through the whole content creation process. In addition to authoring, Mohive also provides frameworks for planning, quality assurance, and publishing.

Mohive customers include:

- BBC
- Jaguar
- LandRover
- Tesco
- BP
- Aviva
- Stepstone
- If Insurance
- Fugro
- PepsiCo
- Skanska
- Insight Enterprise
- Bosch Siemens
- Mott MacDonald

Collaboration

A key aspect to the Mohive system is the ability to collaborate on numerous projects. Subject Matter Experts, Instructional Designers, Trainers, and others can all contribute to the creation, review and publishing of e-learning courses.

Project Management

Only the Mohive system is designed to provide project management control and insights into system usage, project status, and user activity. Mohive even includes a dashboard that provides instant updates.

Integration with LMS

Since most large organisations either have an existing Learning Management System (LMS) or are in the process of selecting one, Mohive feels it's vital to integrate with these systems. Not only does e-learning created in Mohive provide standard SCORM 1.2 and SCORM 2004 packages, but we also provide an additional layer of integration that plugs Mohive in directly with a number of leading LMS vendor, including Saba, SAP, and Oracle.

In addition, we have built a web-services layer in the Mohive system, enabling us to integrate into other software systems, ensuring that the customer is able to configure the system to meet their needs.

Other benefits include:

- Rapid content creation
- SME involvement
- Web-based software system
- Collaboration
- Localise your courses
- Reuse content
- Publishing options
- Testing / question pools
- Advanced authoring without in-depth technical requirements
- PowerPoint conversion
- Support for sound and video
- SCORM compliance
